SUMMARY

AI/ML and Backend-focused engineer with hands-on experience building, testing, and deploying data-driven applications. Strong foundation in Python, machine learning, and RESTful backend systems, with real-world exposure to production APIs, model deployment, and end-to-end ML pipelines. Passionate about translating complex data and models into reliable, scalable software solutions.

EXPERIENCE

Backend Intern, ParallelDots

Oct 2025 – Jan 2026

- Designed and executed automated and manual test cases for backend APIs supporting the product **ShelfWatch**, improving API reliability and regression coverage.
- Collaborated with backend engineers to validate edge cases, error handling, and performance across production-critical endpoints.

Data Science & Machine Learning Intern, SmartED

Sept 2024 – Dec 2024

- Built an end-to-end **sentiment analysis pipeline** using NLP techniques, covering data cleaning, feature extraction, model training, and evaluation.
- Performed exploratory data analysis and visualization using **pandas** and **seaborn** to derive actionable insights from social media datasets.

PROJECTS

WatchBuddy

Jul 2025 – Sept 2025

ReactJS, REST APIs

- Developed a web application to track and manage movies, series, and books, integrating external APIs like **TMDB**, **GoogleBooks**.
- Designed a clean, user-friendly interface in React, enabling organized personal collections and seamless data interaction using **firebase**.

Tuberculosis Detection using CNN

Feb 2025 – Apr 2025

TensorFlow, Keras, Flask, Render

- Designed and trained a **Convolutional Neural Network** to classify chest X-ray images as tuberculosis-positive or normal, using preprocessing and data augmentation to improve model robustness.
- Deployed the trained model as a Flask-based web service on Render, enabling real-time inference through a simple and accessible interface.

AirCanvas

Sept 2024 – Dec 2024

Python, OpenCV, MediaPipe

- Implemented a real-time virtual drawing application using **hand-gesture recognition** and webcam input for touch-free interaction.
- Optimized gesture tracking and rendering pipelines to ensure smooth drawing performance and accurate stroke detection.

CryptYourMind

Oct 2022 – Apr 2023

Django, Python, HTML/CSS

- Developed an educational web platform demonstrating **core cryptographic algorithms** through interactive encryption and decryption tools.
- Implemented user workflows using Django emphasizing clarity, usability, and data safety.

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals (AI-900) **Sept 2025**

- Validated foundational knowledge of artificial intelligence, machine learning, computer vision, NLP, and conversational AI, with practical exposure to Azure Cognitive Services.

Workshop on Agentic AI – Eduxlabs, IIT Madras **Aug 2025**

- Gained hands-on experience in designing agent-based AI systems capable of reasoning, autonomous decision-making, and task execution.

Python for Data Science and Machine Learning Bootcamp – Udemy **Mar 2025**

- Developed practical skills in data analysis, visualization, and machine learning using Pandas, NumPy, Matplotlib, Seaborn, and TensorFlow.

Introduction to Python – Microsoft Technology Associate (MTA) **Aug 2021**

- Demonstrated proficiency in Python programming fundamentals, algorithmic problem-solving, and scripting for automation tasks.

EDUCATION

Master of Computer Application **Sept 2023 – May 2025**

Sam Higginbottom University of Agriculture, Technology Sciences (SHUATS), Prayagraj

Bachelor of Computer Application **July 2020 – July 2023**

Ewing Christian College, Prayagraj

SKILLS

Languages:	Python, C++
ML & Data:	TensorFlow, Keras, Scikit-learn, Pandas, NumPy, OpenCV, NLP
Backend & Web:	Flask, Django, HTML/CSS
Databases:	MySQL, Firebase
Cloud & DevOps:	Microsoft Azure, Vercel, Git, GitHub
Soft Skills:	Problem-solving, Fast Learner, Adaptability
